### Overview

Government of India is taking all necessary steps to ensure that the nation is prepared to face the challenge and threat posed by the growing contagion of COVID-19. The exemplary groundwork and precaution advisory by the Government has helped in containing the spread of the virus in our country. At present, the priority is to make COVID -19 vaccine available to all, ensuring vaccine traceability and beneficiary tracking from production to last mile administration. COVID-19 vaccination drive was initiated to cover healthcare and frontline workers and scaled up to cover citizens above 45 years of age. Now, the vaccination has opened up to cover all citizens aged 18 years and above.

Co-WIN application is the digital back bone for the vaccination drive in India. With scaling up of vaccination; the number of vaccination facilities and sessions has to be increased and managed effectively. The CO-WIN application will facilitate the citizen with an option to register and schedule the vaccination session online in Centers of their choice. The Citizen self-registration module will ensure fool-proof identification of deserving candidates for receiving the vaccines. The Co-WIN application facilitates multiple role creations for orchestrating vaccination drive at various levels.

The objective of the document is to handhold the citizens to register and schedule an appointment for vaccination.
